

CLASS 10 PESTICIDES

Ingredients contained in pesticides products allowed for use under the public health or safety exception. These are the only ingredients that may be used to control plants that are poisonous to the touch under the public health or safety exception.

No.	A.I. Code(s)	ACTIVE INGREDIENT NAME
1.	GLG	Glufosinate Ammonium
2.	GPS	Glyphosate
3.	GPI	Isopropylamine salt of Glyphosate

Note: Under Section 4(1) of Regulation 63/09 under the Pesticides Act the Director has the authority to add or remove pesticides to maintain an updated list. As such, the number and names of pesticides on these lists will change over time as newly registered pesticides are classified for sale and use in Ontario, or as products are reclassified or declassified.
