May 1993

TABLE OF CONTENTS

CHAPTER 1: INTRODUCTION	1
CHAPTER 2: PLANT RESPONSE TO AIR & SOIL POLLUTANTS	2
A. Symptom Development	2
1. Acute Response	3
2. Chronic Response	3
3. Intermediate Response	3
B. Susceptibility Ratings	4
CHAPTER 3: EVALUATION OF INJURY OR LOSS	5
A. Visible Injury Assessment	5
B. Yield and Growth Assessment	9
1. Seed Crops	9
2. Forage Crops	9
3. Vegetable Crops	10
4. Growth Parameters	10
a) Plant Height	10
b) Plant Weight	10
c) Leaf Size (Leaf Area)	10
d) Shoot Length	10
e) Stem Diameter (dbh)	11
f) Annual Ring Width	11
g) Stem Analysis	13
5. Quality Parameters	14
6. Reproductive Potential	15
CHAPTER 4: CONDUCTING ASSESSMENT SURVEYS	16
A. Assessment Surveys	16
1. Survey Type or Emphasis	16
2. Survey Configuration or Layout	16
3. Species Selection	19
4. Survey Timing	19
5. Control Site Selection	20
6. Summary of Assessment Survey Preparation Procedures	20
B. Auxiliary Support Techniques	20
1. Indicator Plots	20
2. Moss Bag Ion Receptors	22
3. Bioassay Growth Studies	26
4. Leaf Litter Bags	27
5. Snow Sampling	28
a) Site Selection	28
b) Sample Collection	28
6. Etiolated Pea Seedlings	29

CHAPTER 5: SAMPLE COLLECTION PROCEDURES	31
A. Vegetation	31
1. Inorganic Chemical Analysis	31
a) Tree and Shrub Foliage	32
b) Forage	32
c) Garden Produce	33
2. Organic Chemical Analysis	33
B. Soil	33
1. Inorganic Chemical Analysis	33
a) Total Concentration	33
b) Plant-available or Extractable Levels	33
2. Fertility	34
3. Lead in Residential Soils	34
a) General Sampling Guidelines	34
b) Site Selection	35
4. Conductivity Determinations	35
5. Organic Chemical Analysis	35
a) WHMIS Requirements	35
b) Control of Cross-contamination	36
c) Equipment Cleaning Procedure	36
d) Sample Containers	36
e) Sample Preservation	36
f) Organic Sampling Kits	37
6. Soil Sampling for Decommissionings	37
a) Soil Variability Principles	37
i) Soil is Variable!!	37
ii) Scale of Variability	37
b) Sources of Variability	37
i) Natural	38
ii) Anthropogenic	38
c) Planning Soil Sampling	38
i) The Purpose of Sampling	38
ii) Background Information	39
iii) Sampling Schemes	40
iv) Phased Sampling	40
d) Verification Sampling	41
e) Additional Considerations in Sampling for Decommissionings	41
7. Soil Radioactivity Testing	42
C. Sampling for Non-chemical Analysis Purposes	42
1. Pathology Diagnosis	42
2. Nematode Disease Diagnosis	43
3. Diagnosis of Insect Pests	43
4. Histology Diagnosis	43
a) WHMIS Requirements	43
b) Sample Collection Procedures	44
5. Herbarium Preservation	45
CHAPTER 6: SAMPLE COLLECTION	45

CHAPTER 7: INTERPRETATION OF CHEMICAL ANALYSIS RESULTS	46
APPENDICES	47
APPENDIX A DEFINITIONS	48
APPENDIX B A KEY TO PLANT NUTRIENT DEFICIENCY SYMPTOMS	53
APPENDIX C RELATIVE SENSITIVITY CHARTS FOR COMMON PHYTOTOXIC POLLUTANTS	55
APPENDIX C1 - FLUORIDE	56
APPENDIX C2 - OZONE	62
APPENDIX C3 - SULPHUR DIOXIDE	67
APPENDIX C4 - AMMONIA	73
APPENDIX C5 - HYDROGEN CHLORIDE	78
APPENDIX C6 - CHLORINE	81
APPENDIX C7 - LANDFILL GASES	84
APPENDIX D DERIVATION AND SIGNIFICANCE OF PHYTOTOXICOLOGY "UPPER LIMITS OF NORMAL" CONTAMINANT GUIDELINES	87
TABLE D1 CONTAMINANT GUIDELINES REPRESENTING THE "UPPER LIMITS OF NORMAL" FOR SOIL AND VEGETATION	88
TABLE D2 CONTAMINANT GUIDELINES REPRESENTING THE "UPPER LIMITS OF NORMAL" FOR SNOW MELT WATER	89
TABLE D3 CONTAMINANT GUIDELINES REPRESENTING THE "UPPER LIMITS OF NORMAL" FOR MOSS BAGS	90
APPENDIX E: CLEAN-UP GUIDELINES FOR SOILS	91
TABLE E1 CLEAN-UP GUIDELINES FOR SOILS	92
TABLE E2 PROVISIONAL CLEAN-UP GUIDELINES FOR SOILS IN PROPOSED LAND USE	93
APPENDIX F CONVERSION FACTORS FOR GARDEN PRODUCE	94
TABLE F1 CONVERSION FACTORS FOR MOISTURE DETERMINATION	95
APPENDIX G SOIL ELECTRICAL CONDUCTIVITY	97
